Highlights

Learn about light

Color temperature: light can have different color temperatures, indicated

in units called Kelvin (K). Bulbs with a low Kelvin value produce a warm, more tranquil light, while those with a higher Kelvin value produce a cool, more energizing light. CRI: the color rendering index (CRI) is used to describe the effect of a light source on color appearance. Natural sunlight has a CRI of 100. The CRI of Philips LED light bulbs is always higher than 80, which ensures colors are shown as true and natural.

Replaces standard incandescent

With its beautiful design and familiar shape, this energy-saving LED bulb is the perfect sustainable replacement for traditional incandescent bulbs.

Saving up to 90% energy

LED technology saves up to 90% energy compared to your standard bulb. It therefore pays for itself and saves you money year after year. It also helps protect the environment.
